

Atlanta Global One Team Training

In Charleston, SC we have another colleague who is an OB-GYN, name Dr. Paula Orr of the Charleston Women's Wellness Center. She is the only black female OB-GYN in that city and she is also an Independent Distributor of Ardyss product.

She stated on a call this week that the Body Magic is made from latex from a particular Brazilian tree. This material promotes the thermo genesis within the fatty tissue that reduces the abdominal circumference, thereby reducing your abdominal area. This further proves the importance of general health and wellness; this ultimately improves your overall quality of life. The abdominal circumference is directly associated with health problems such as heart disease.

She also suggests to utilize the Body Magic in conjunction with the detox colon cleanse products we have and that it's a good idea to do the detox colon cleanse first and that jumps starts any weight loss process. The products she specifically recommends to her patients who wish to get the fastest and most optimal results is to do the detox cleanse, and use the Power Boost product in conjunction with the Body Magic.

The Body Magic also strengthens your Core. 90% of our fatty tissue is water, and the BM compresses the fatty tissues and causes the excess fluids to be flushed out thru your lymph nodes. This also helps to speed up your metabolism. It helps with you posture and improves your back pain. We have Bogys, surgeons and chiropractors selling these garments to their patients.

Wearing the BM is called Lypo-transportation! We are transporting that fatty tissue into the garment, so the human eye can no longer see it. 😊

Orthopedic quality garment, takes the pressure off your shoulders, helps to realign your spine, and puts your organs back into place. Provides back support, lifts your bust line, helps you medically and cosmetically, tapers in your hips, and prevents chaffing when you walk.
